The book features women from all walks of life, including scientists, engineers, mathematicians, computer scientists, and more. They come from diverse backgrounds and have overcome a variety of challenges to achieve success in their fields.

The stories of these women are both inspiring and educational. They show us that anything is possible if we have the determination to pursue our

dreams. They also remind us of the importance of diversity and inclusion in STEM.

Changing the Equation is a must-read for anyone who is interested in STEM, diversity, or the empowerment of women. It is a book that will inspire you to reach for your dreams and make a difference in the world.

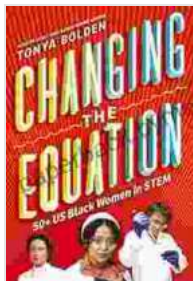

Profiles of 50 Black Women in STEM

- **Dr. Shirley Ann Jackson** is the president of Rensselaer Polytechnic Institute. She is the first African American woman to lead a major research university.
- **Dr. Mae Jemison** is a former NASA astronaut and the first African American woman to travel into space.
- **Dr. Kizzmekia Corbett** is a viral immunologist who helped develop the Moderna COVID-19 vaccine.
- **Dr. Joycelyn Elders** is a former Surgeon General of the United States. She is the first African American woman to hold this position.
- **Dr. Valerie Montgomery Rice** is the president and CEO of the Morehouse School of Medicine. She is the first African American woman to lead a medical school.

These are just a few of the many inspiring women featured in Changing the Equation. This book is a celebration of the achievements of black women in STEM and a call to action for us all to do our part to create a more diverse and inclusive STEM workforce.
