

For example, the following CSS rule will make all of the text on your page blue and centered:

```
css body { color: blue; text-align: center; }
```

You can also use CSS to create more complex formatting, such as adding drop shadows or gradients to your text. For more information on CSS, please refer to the following resources:

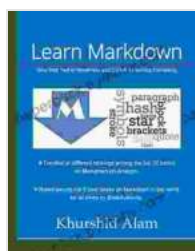

- [W3Schools CSS Tutorial](#)
- [Mozilla Developer Network CSS Reference](#)

Using HTML to format web text

HTML (Hypertext Markup Language) is the language used to create web pages. It can be used to add structure and meaning to your text, as well as to link to other web pages.

To use HTML to format your web text, you can use a variety of tags, such as

,
