When choosing an armadillo, it is important to find a healthy animal from a reputable breeder. The armadillo should be alert and active, and its eyes

and nose should be clear. You should also check the armadillo's shell for any cracks or injuries.

## **Enclosure**

Armadillos need a spacious enclosure that provides them with plenty of room to move around. The enclosure should be at least 10 feet long, 6 feet wide, and 3 feet high. It should be made of a sturdy material, such as wood or metal, and it should have a secure top to prevent the armadillo from escaping.

The enclosure should be furnished with a variety of items, including a hiding place, a sleeping area, and a water bowl. The hiding place can be a simple box or a piece of PVC pipe. The sleeping area should be a soft, cozy spot where the armadillo can curl up and sleep. The water bowl should be large enough for the armadillo to drink from and bathe in.

## **Diet**

Armadillos are omnivores, and they will eat a variety of foods, including insects, fruits, vegetables, and small animals. A good diet for an armadillo consists of:

- A commercial armadillo food
- Fresh fruits and vegetables, such as apples, bananas, carrots, and celery
- Insects, such as crickets, mealworms, and dubia roaches
- Small animals, such as mice and rats

It is important to offer your armadillo a variety of foods to ensure that it is getting all the nutrients it needs. You should also make sure that your armadillo has access to fresh water at all times.

## Health

Armadillos are generally healthy animals, but they can be susceptible to a variety of health problems, including:

- Respiratory infections
- Gastrointestinal problems
- Skin infections
- Metabolic bone disease

It is important to take your armadillo to the vet for regular checkups to ensure that it is healthy. You should also watch for any signs of illness, such as lethargy, loss of appetite, or diarrhea.

Armadillos can make great pets for the right people. They are relatively low-maintenance animals, and they can be quite affectionate and playful. However, it is important to do your research before getting an armadillo, as they can have some specific needs. By following the tips in this guide, you can help your armadillo live a long and healthy life.
